

OYSTER CREEK EMERGENCY PROCEDURE

Dear Parents,

As you may be aware, a portion of this county may be affected in the event of a problem at the Oyster Creek Nuclear Generating Station. While it is highly unlikely that a plant condition could warrant protective actions, it is wise that our residents be trained and prepared for the remote possibility.

The State, County, and your Municipality have combined resources to prepare a detailed plan for an emergency. This message is a part of a public education program to acquaint you with details which affect your school children.

In the event of an emergency, the first action may be IN-PLACE PROTECTION/SHELTERING. At this level, students will remain indoors to reduce or eliminate exposure. If the plant condition continues, long before the public is in danger, an evacuation will be ordered. Specific plans have been developed for transportation routes, drivers, and other resources necessary to remove school children to safe locations.

Your child registered in the Southern Regional School District will be transferred, with adult supervision, to the Richard Stockton State College in Pomona, Atlantic County, where they will be registered and cared for until your arrival to pick them up and reunite with family. If you wish to give any other adult authorization to pick up your child, please notify school officials and follow the required procedures.
