Principal

Mrs. Jaclyn A. Hemenway
Assistant Principal

January 7, 2026

Dear Incoming 7th Grade Southern Regional Family Members,

In January of each year, we begin the process of planning for our incoming 7th grade class, in your case, the Class of 2032. We strive each year to ensure that our incoming students' transition from 6th to 7th grade be a smooth one. One of the most effective ways to do so is to periodically provide you with the information you need to navigate through the transition and feel welcomed into the Southern family.

While all course information is available in the SRMS Program of Studies your child will receive, a quick video tutorial with helpful information to assist you and your child in completing the elective course selection process will be posted on the SRMS homepage in a section titled "2026-27 Incoming 7th grade Course Selection Information."

You will find a timeline of the process below as well as an explanation of each of the components of the process. As you enjoy these last months as a 6th grade family, know we are working to create a place for you at SRMS. It won't be long before you are a Southern Regional Ram!

Sincerely,
SRMS Administration and Faculty

Date	Event
By January 6	Program of Studies delivered to elementary schools and posted on SRMS homepage Course selection process informational video posted on SRMS homepage
January 21	Deadline to return signed Course Selection Sheet to elementary schools (It will be mailed to you by SRMS on or about Jan. 7.)
May (TBD)	SRMS Assistant Principals visit elementary schools Athletic information, plus Introduction and Welcome posted to SRMS homepage
August (TBD)	7 th Grade Orientation for students and parents

Noteworthy:

Program of Studies- This booklet provides a course description for each course offered to 7th and 8th graders. It is beneficial to assist incoming students in understanding the required courses and discussing the elective options with parents/guardians.

Encore- The majority of our students experience these four quarter workshops, exploring each course for a ten-week marking period: Design Engineering, Applied Technology, Money Smart, and Spanish.

Math Placement - Students will be placed in one of three levels: General, Advanced, or Honors. All 7th grade math levels are designed to give students the opportunity to move into an Algebra course in 8th grade. Placement will be determined through elementary teacher input using a recommendation rubric reflecting learning tendencies at each level, i.e. independent learning, homework completion, ability to show work in sequential order, etc. The math placement for a CST student will be aligned with the IEP.
